User Manual  
**DEUFA Rat Trap**  
 Art.-No.: 240006, 910008

## Intended use

The DEUFA Rat Trap is intended to use for catching rats indoors and in roofed outdoor areas taking into account the warnings and operating instructions of this manual. The area where traps are set up must be marked and secured. Uninvolved persons and children must be kept away areas with set traps. The manufacturer is not liable for risks and damage resulting from improper use. The risks of improper use lie with the user.

Keep the DEUFA Rat Trap away from children. Bear in mind that you are using an snap trap that poses a risk of injury due to its principle of function. Store the DEUFA Rat Trap safely from in a dry environment to avoid mechanical and corrosion damage to the wood and wire components. Carry out a visual inspection of the components before first use and after storage to detect any damage.

| Dimensions: | 95 x 50 x 15 mm                     |

## Commandments and warnings

Read the instructions before using the animal trap. It provides important information for the safe use of the snap trap. This will help you avoid injuries when setting and positioning the trap and protect your children and bystanders.

Always wear sturdy gloves (e.g. leather gardening gloves, assembly gloves or similar) during contact with the traps. These prevent abrasions, cuts and punctures, especially as a result of crushing when the trap snaps unintentionally!

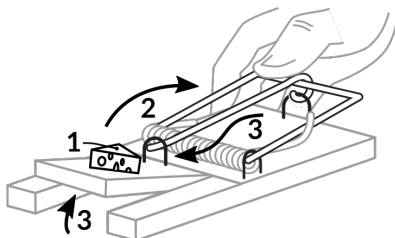

Attention, high impact force and danger of crushing - Increased caution during contact with the trap!

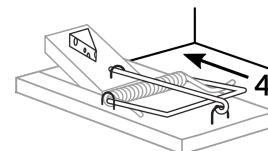

Snap traps pose a risk of injury to bystanders and children. It is imperative that you keep the traps away from bystanders and children and ensure that bystanders and children do not have access to set and positioned traps. Mark and cordon off the room or area where the strung traps are positioned.

## Operating instructions

Conventional snap trap for catching rats indoors and in roofed outdoor area.

Fix the bait in bait hanger place the trap bar to the rear, pretension wire loop by 180°, lock the trap bar over the wire loop onto the rocker. **Attention** - when setting the trap, do not reach into the effective range of the wire loop!

Place baited, set trap with the rocker to the wall along usual walkways of the mice and check the trap regularly. Mark and cordon off rooms and areas with set traps!
